

## Available now!

The Original Keymer test and therapy ampoules of the

- 1) so-called Swine flu vaccination (H1N1)
- 2) "usual" Flu vaccination 2009/2010 (Begrivac)
- 3) Human papillomaviruses HPV (Cervarix)
- 4) Human papillomaviruses HPV (Gardasil)
- 5) Yellow fever vaccination (Stamaril)

Preetz, November 2009

Dear colleagues,

Thanks to our highly esteemed colleague MD Dorothea Lang and my wife Gabriele who both provided us with the necessary vaccines we are delighted to be able to offer you the corresponding vaccination ampoules from now on. Therefore, we will all be well equipped in our practices. You can obtain these vaccination ampoules simply by using the enclosed order form or via our internet shop at [www.therapeutisches-haus.de](http://www.therapeutisches-haus.de) at the price of € 110.00 plus VAT.

In the Sueddeutsche Zeitung of 14 / 15 October, the question regarding the safety of the vaccine against swine flu was answered there as follows: "On 24 September the European Medicines Agency EMEA authorised Pandemrix and Focetria followed by the authorisation of Celvapan on 1 October. It says in EMEA's explanation: The vaccine has been authorised under 'Exceptional Circumstances'. This means that it has not been possible to obtain full information about the pandemic vaccine." **EMEA continues in writing that safety however will be guaranteed "as the companies will collect information on the safety of the vaccine while (!) it is being used."**

Even if anyone knows how 'the wind blows' one is still surprised by the impudence that the pharmaceutical industry increasingly and frankly displays.

Those who work with the Original Keymer test kits of the Cross-linked test technique are now able to work therapeutically against this ineffable vaccination and its consequences - there have already been cases of death in Sweden.

Please use these vaccination ampoules to restrict all stresses, especially the neurological stresses that are to be expected among people after the mass vaccination as far as possible.

INFORMATION

In this context, I would also like to draw your attention to the following elaborations:

- The official statement to the so-called swine flu by the Quality Circle of I.M.U.'s graduates at [www.imu-online-college.de](http://www.imu-online-college.de) → box 'Aktuelles' in which we summarise the backgrounds and the diagnostic and therapeutic systematic,
- My remarks about the vaccination against cervical cancer that you can obtain by e-mail: [info@therapeutisches-haus.de](mailto:info@therapeutisches-haus.de).
- All other pieces of information published at [www.therapeutisches-haus.de](http://www.therapeutisches-haus.de), box 'Aktuelles'

Please read and disseminate this information so that we can defy the increasing madness of politics and pharmaceutical industry. We can only meet and work against the increasing endangerment of our patients' health by information, information, and again information!

With collegial regards,

Martin Keymer

**PS: Important information about the vaccination against the so-called swine flu**

A precondition for the continuity of a pregnancy is that the woman's immune system switches over (especially on the uterus, via the 2<sup>nd</sup> chakra) to a priority of the extra cellular immunity (TH2 status).

In case this does not happen at all or only incompletely, the intra cellular immunity (TH1) is in danger to reject the foetus.

Especially the concomitant noxae in the vaccine (particularly the nanoparticles of the squalenes in the swine flu vaccine) trigger the TH 1 defence.

To be precise: Abortions can be initiated by concomitant noxae in the vaccine!! Therefore, especially pregnant women should be made aware of the dangers particularly due to these imminent abortions, so that everybody has this vital information to make a decision.

Significantly, this whole context has not been clinically examined yet.  
Argumentation: Emergency authorisation procedure!
